

Stop Chasing Closeout Data

Get what you need from day one to **eliminate last-minute drama.**

CUT THE STRESS

You know the 11pm email from the agency asking where the work happened on Tuesday. You know the payment request that came back rejected because the documentation didn't tie the work to a location. You know the 90 minutes after dinner spent rebuilding the daily diary from memory and the foreman's text messages. **You did not sign up for that kind of stress.**

STATE HIGHWAY 3 • 1255+42 I9L • 5:55 PM
→ DRIVEWAY MARKUP

US 30 • 367+75 22R • 5:07 AM
→ PUNCH LIST

I-80 • 840+98 05L • 2:22 PM
→ DENSITY CORE

A SMALL INVESTMENT GETS YOU PAID

OnStation puts the station on **every phone on the project.** Every flag your crew drops, every photo they take, every form they fill out is stamped with their location and time. The daily diary builds itself from the field data. When the agency asks where the work happened, the answer is right there, and **payment is approved cleanly.** Your closeout is successful because your crews captured data correctly from day one.

CAPTURE THE PROJECT RECORD WHEN IT HAPPENS

IT'S ALL THERE

When the agency emails at 11pm, everything they need is right there.

DAILY DIARY = READY TO GO

Every flag, photo, & quantity lands tagged to station, time, & operator.

CLOSEOUT-READY

Make it easy for them to pay you. Nothing to rebuild from memory.

EASY SETUP & SELF-TRAIN

The crew trains itself. First flag drops the same day they install the app.

Every day without OnStation is another day crews capture incomplete data for you to chase and fix later.
Save time now. Do Future You a favor.

Your project is already in OnStation.
