OnStation

FOR FOREMEN, SUPERVISORS, OPERATORS, DENSITY TECHS, MOT INSPECTORS, QC. ANYONE ON THE PROJECT TODAY.

Stop Chasing Location

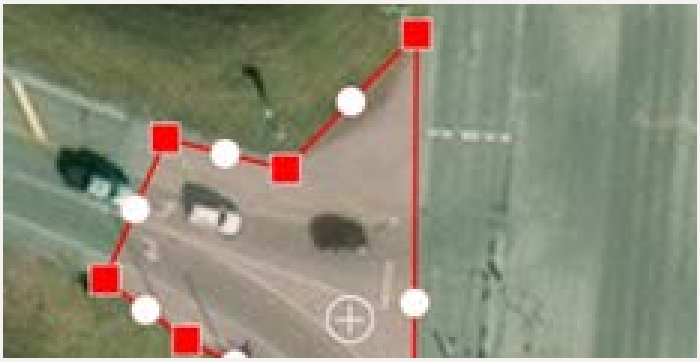

Open the App. See Where You Are.

STOP WANDERING AROUND

You spend part of every shift trying to figure out where you are. The stakes are gone, mowed over, or never got placed. You wheel off from the last marker you can find. You walk across live traffic to check. You text the foreman from one end of the project to the other, and you haven't even started working yet. It's hot, and you just want to get where you need to be.

GET THERE FAST

Open the app. Your station is there. Drop a **flag,** a pin that marks where the work is. This flag is tied to the station, the time, and you (the user). Take a photo and the station is embedded on the photo. Ditch your phone group text and start a digital conversation that is recorded and **always includes the station**. No tablet. No login every shift. If you can text, you can use OnStation.

ROUTE 152 • 460+19 341R • 9:41 PM → HMA QUANTITY ESTIMATING

WHEELER ST • 102+71 22L • 7:35 AM → CURB & GUTTER POUR

WHAT THIS LOOKS LIKE ON THE JOB

BUY-IN

A skeptical paving veteran tried it once. Thirty seconds in, he was sold.

GET TIME BACK

A density tech crew used to grind 16-hour days. Now they work standard shifts.

STAY SAFE

Night crews stopped walking across live traffic to find a station marker.

USE YOUR PHONE

Every project runs on the phones the crew already has. No new hardware.

Every day without OnStation you're wasting time.
There's a better way to do your job.

Your project is already in OnStation.
Try the app now.
